

1       26. (UNAMENDED) The apparatus according to claim 25, wherein the modem comprises  
2       a cable modem.

1       27. (AMENDED) The apparatus according to claim 15, further comprising a real time  
2       clock coupled to the programmed processor, and wherein the interface receives an image  
3       for transmission whenever the real time clock reaches a designated time.

1       28. (AMENDED) The apparatus according to claim 15, further comprising a database  
2       associating display parameters with the address, and wherein the formatting is carried out  
3       in accordance with the display parameters.

A marked-up version of the amendments to the claims is included as an attachment  
hereto.
